Our governments are picking fights they cannot win. They know this. Money is laundered: weapons are low, ships are old, recruitment down, yet despite not having enough troops, they wage wars.

# The U.S. is not prepared to fight one major war, but three major wars are rapidly approaching

Why? Treason that's why.

They don't want to win. They have sold our countries out and expect to be taken over. They know there is not enough troops and because of this will expect people to accept conscription into the meat grinder. The outcome no matter what is more depopulation. Which is their goal.

Me and the boys being drafted because Taylor Swift convinced women to vote for a warmonger.

Both sides know this, both sides want this. Both sides are actually on the same side behind the scenes, working for the same people.

Our governments need a world war to depopulate the military age men and women that would be a threat to them, to cover vaccine genocide, and rob our nations of our societal effort to keep us down. All while putting us into further into debt with the central banks. All wars are banker wars.

DO NOT COMPLY, DO NOT CONSENT. DO NOT GO TO WAR FOR THEM

DO NOT GIVE THEM WHAT THEY WANT.

Instead, unite, defend and become self sufficient.

If you are in the military or police uphold your oath, stand with the people and knowing the wars are fake behind the scenes but very real in person, choose instead to arrest the few who are waging the war. In all countries.

It is the people against the evil scum practical few. We as people of all nations are not each others enemy. Humanity has a common enemy, we are many, our real enemy are few.

World war III will not be waged if no one shows up, but instead arrests the war mongers.
